

Exercices – Comprendre le théorème

Exercice 1 :

Nommer l'hypoténuse de chaque triangle rectangle ci-dessous :

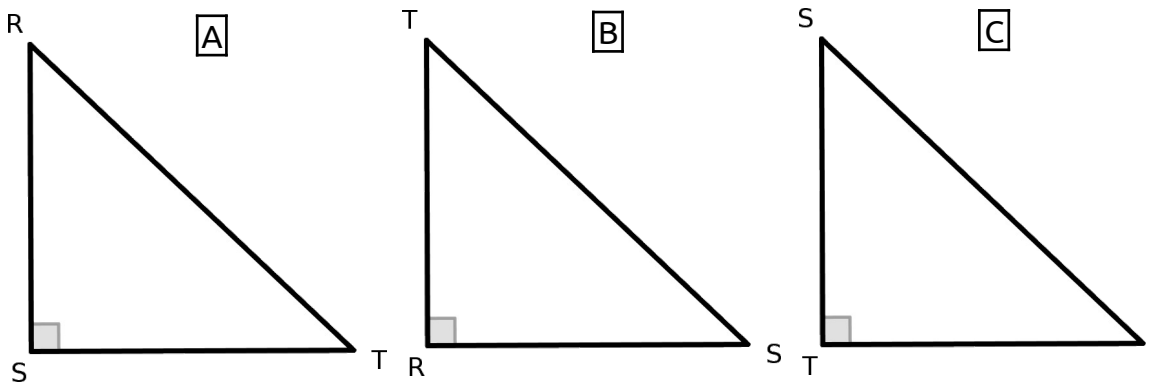

Exercice 2 :

Calculer : $5^2 =$ $7^2 =$ $11^2 =$ $1^2 =$ $3^2 =$ $9^2 =$

Exercice 3 :

Associer à chaque triangle l'égalité de Pythagore correspondante. Une égalité ne correspond pas.

1) $SR^2 = ST^2 + TR^2$

2) $TR^2 = TS^2 + RT^2$

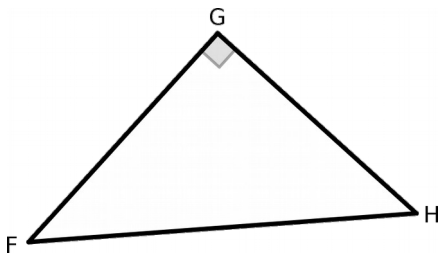

3) $ST^2 = TR^2 + RS^2$

4) $RT^2 = RS^2 + ST^2$

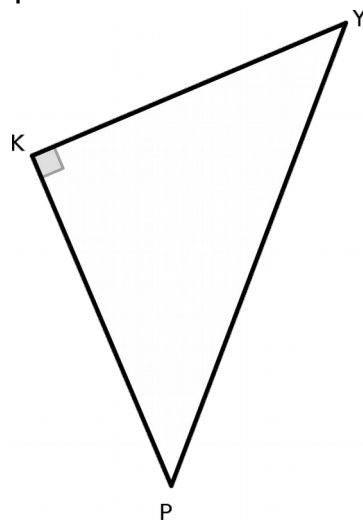

Exercice 4 :

Pour chaque triangle, écrire l'égalité de Pythagore correspondante.

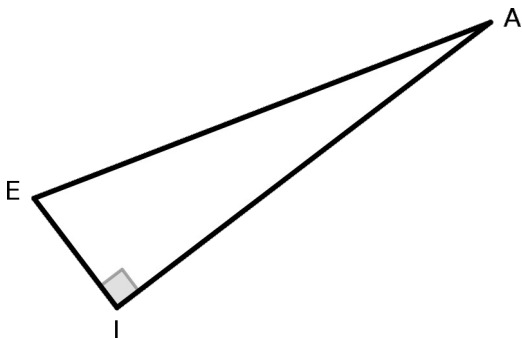

1)

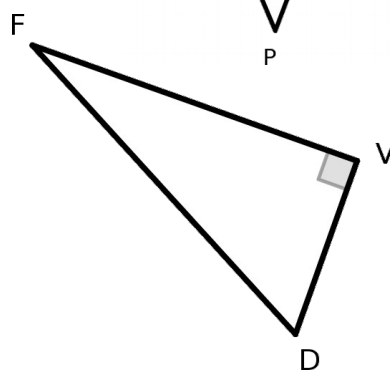

2)

3)

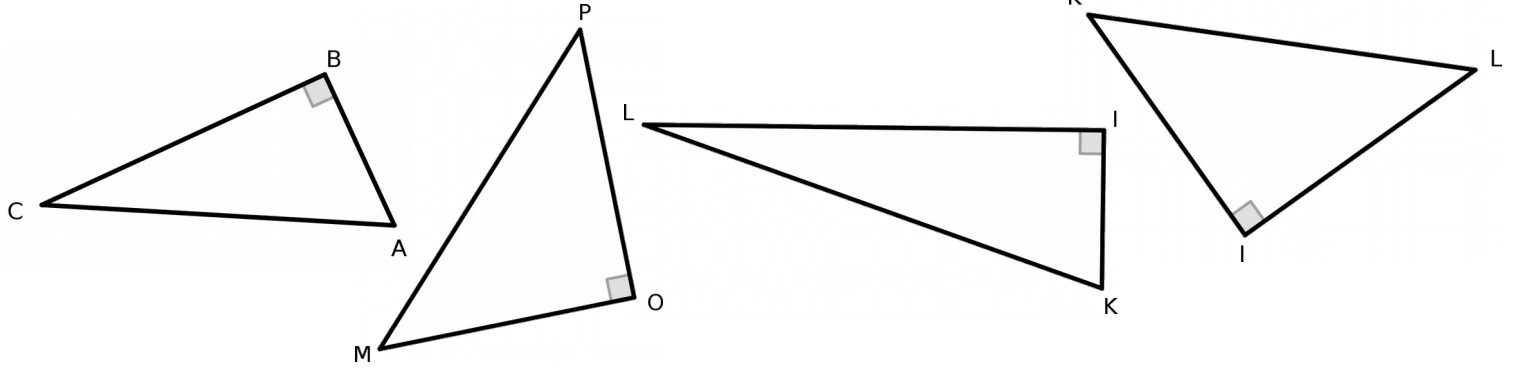

4)
